DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of claims 18-20 in the reply filed on 3/6/06 is acknowledged.
2. Claims 1-17,21-22 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Specie, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 3/6/06.

Specification

3. The disclosure is objected to because of the following informalities: Page 2, Patent no. 5,524,551 appears to be incorrect. Page 4 line 17, "the a" appears to be incorrect. Appropriate correction is required.
4. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

6. Claims 18-20 are rejected under 35 U.S.C. 102(a) as being anticipated by Borgersen et al.(US 6318934).

Borgersen et al. discloses a retaining wall (10) comprising a plurality of blocks (12) with at least one groove (16) to receive a stabilizing element (22) and an anchoring element (20).
